

# KWK

A novel lubrication device requiring no tubes or wires which thanks to IC control, is capable of effective lubrication without wasting grease.

**NEW**

## QUICK LUBRICATOR **JUNPET KJP-1**

Patent pending  
Design patent pending

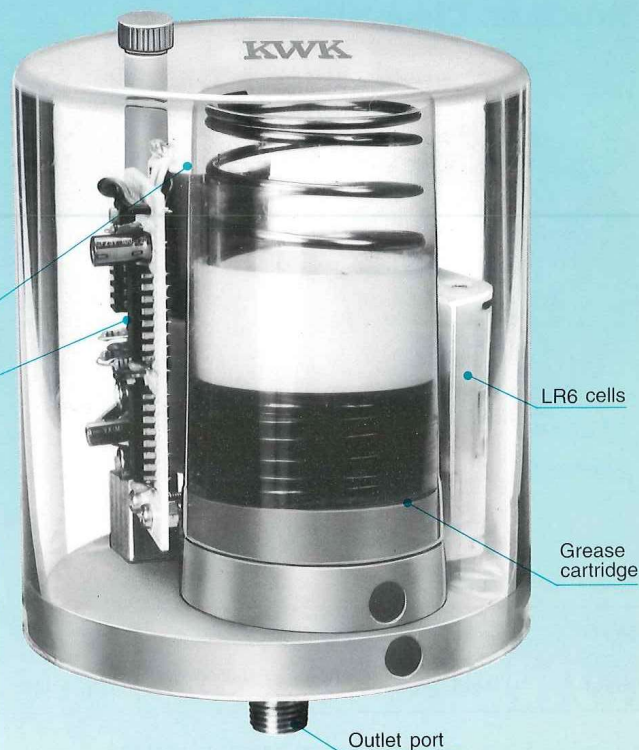

### Features

Have you had problems with high costs due to a lubrication system requiring many man-hours or because of the expense of a centralized lubrication system? Or perhaps you've seen damage caused by inadequate lubrication because limited floor space led to a less-than-thorough job? The Quick Lubricator "JUNPET" eliminates these problems, preventing breakdown and reducing costs.

Geared motor

IC PCB

### ● Grease Cartridge

LR6 cells

Grease cartridge

Outlet port

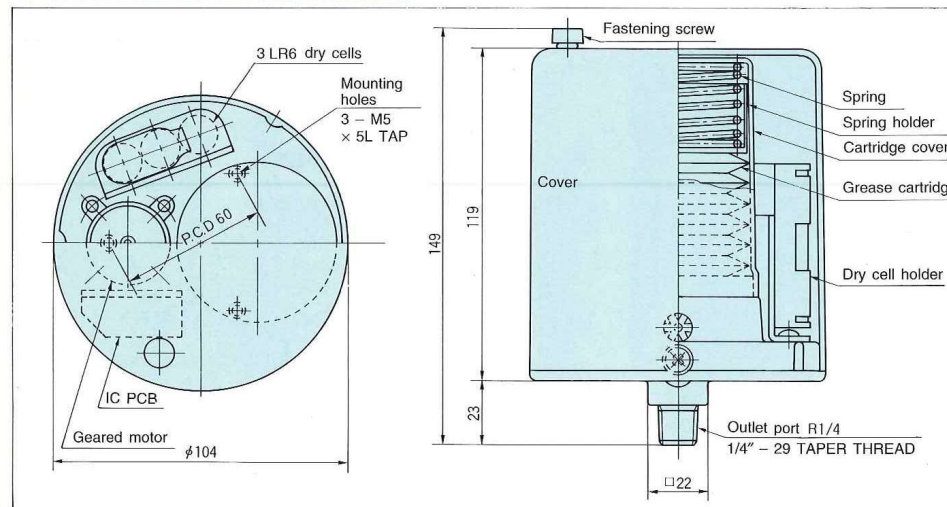

**KOWA CORPORATION**

# The KJP-1 System Reduces Machine Lubrication Man-hours and Other Costs

## ● Major advantages

1. Eliminates the costs of tubes and wires.
2. Lubrication intervals can be adjusted to 1, 2, 4, or 8 hours, and the lubrication time can also be adjusted from 1 to 7 sec, depending on the requirements of the machine.
3. Microcomputer control assures the delivery of the exact amount of grease.
4. The lubricator is compact permitting installation anywhere.
5. Since grease is replaced using a cartridge, there is no possibility of foreign matter contaminating the lubricant.
6. The grease cartridge simplifies lubricant refilling.

## ● Structural Dimensions

## ● Specifications

Model.	Discharge pressure	Delivery	Cycle times	Grease cartridge	Lubrication time
KJP-1	MAX. 3kg/cm <sup>2</sup>	0.05 ~ 0.35cc/cycle (1 ~ 7 sec)	1, 2, 4, 8Hr	60g	170 ~ 1,200

※ Replace the LR6 dry cells when replacing the grease cartridge.  
The above spare parts are kept in stock. Kindly place orders with us.
